

gh protein

top-quality protein that supports any wellness goal

WHAT IS IT?

Whether you want to support your metabolism, build muscle, or manage your weight, you know that protein is the answer. But not all protein is the same - that's why BioReigns created GH Protein, a flavored whey isolate protein powder with our exclusive nutrient-delivery technology, rapidCT.

WHAT DOES IT DO?

No matter your health goals, GH Protein can help! For those hoping to build muscle, Ipamorelin peptide and BCAA's may help promote muscle growth, and may support the body's production of even more protein on its own. Ipamorelin can also help those looking to slim down by supporting the body's fat burning process. The 20 grams of protein and just one gram of sugar per serving mean you'll feel full without cheating on your diet!

KEY INGREDIENTS	FUNCTION
-----------------	----------

whey protein isolate

A potent, fast-absorbing mix of proteins derived from milk. Whey protein can help reduce blood pressure, help you feel full, and may even help reduce oxidative stress in the body.

ipamorelin peptide

A short chain of amino acids that promotes the release of growth hormone in the body. Growth hormone impacts several bodily processes, including metabolizing stored energy, building muscle, and supporting liver health.

baaa

Branched-chain amino acids found in high-protein foods like eggs and meat. Studies have found that BCAA's may help with both muscle growth and preventing muscle loss.

rapidCT

Our exclusive RapidCell Technology protects and delivers each nutrient quickly, efficiently, and directly to your cells through water absorption.
